PROFESSIONAL SUMMARY

Backend-focused Software Engineer specializing in Golang, RESTful APIs, and scalable backend architecture. Experienced in developing full-stack web applications using React, Next.js, MySQL, and Docker. Passionate about clean architecture, AI integration, and building maintainable software systems.

TECHNICAL SKILLS

Languages: Go • Python • JavaScript

Frontend: React • Next.js

Backend: Golang • Flask • FastAPI

Database: MySQL

Tools & Practices: Docker • Git • Linux • CI/CD (GitHub Actions) • Clean Architecture • REST API Design • AI Integration

KEY ACHIEVEMENTS

- Selected as Learning Department Coordinator at COCONUT Computer Club, leading technical learning programs for the organization.
- Delivered two production full-stack applications — AgroAdvisor (AgriTech) and Lakoo (SaaS ERP).
- Authored a published conference paper on educator competence and innovation, and earned Software Engineering & Go certifications from TestDome.

PROFESSIONAL EXPERIENCE

Learning Department Coordinator & Full-Stack Engineer — COCONUT Computer Club *Sep 2025 – Present (11 months) | Makassar, Indonesia*

- Lead planning and execution of technical learning programs — workshops, learning materials, and mentoring coordination — to strengthen members' software engineering skills.
- Design, develop, and maintain scalable backend services and RESTful APIs in Golang using Clean Architecture; build full-stack web apps with React, Next.js, and MySQL.
- Develop Python-based AI features (recommendation systems, LLM integration) and implement authentication, validation, logging, and error handling for security and reliability.
- Containerize applications with Docker, contribute to CI/CD via GitHub Actions, and integrate third-party services across the full SDLC.

Research and Development Intern — PT Algoland Global Digital *Dec 2025 – Feb 2026 (3 months) | Makassar, South Sulawesi, Indonesia*

- Designed and assembled robotic and IoT-based prototypes using Arduino, ESP32, and other components, including embedded features for automation and real-time device communication.
- Conducted hardware/sensor research and collaborated on prototype evaluation, troubleshooting, and system improvement.

Public Relations Committee — idsecconf *Nov 2025 (completed) | Makassar, Indonesia*

- Served on the Public Relations Committee for IDSECCONF 2025, an IT conference in Makassar — built sponsor/partner relationships and promoted the event to schools, universities, and communities.

FEATURED PROJECTS

AgroAdvisor — *Full-Stack Developer & AI Engineer*

- A smart agriculture system helping farmers optimize crop management — planting, fertilization, pesticide usage, and automated water pump control — through AI-assisted, technology-driven recommendations.
- Built frontend interfaces in Next.js, backend services/RESTful APIs in Golang with MySQL, and Python AI recommendation features integrating Gemini, Groq, and Ollama LLMs with IoT device communication.

Lakoo — *Full-Stack Developer*

- A SaaS-based ERP platform helping small and medium-sized businesses (UMKM) manage and optimize operations with integrated business management features and AI-powered recommendations.
- Built frontend interfaces in Vite.js and scalable backend/RESTful APIs in Golang with Python AI features; managed Docker workflows and deployed via Railway and Vercel.

EDUCATION

Bachelor of Engineering, Informatics — Universitas Negeri Makassar | *Aug 2023 – Jun 2027 | GPA: 3.91*

CERTIFICATIONS

- TestDome (Jul 2026):** Software Engineering ([verify](#)); Go Programming Language ([verify](#))
- Alison (Jul 2026):** Scalable Python Web Development Using Flask ([verify](#)); NGINX/PHP/MySQL/SSL ([verify](#)); MySQL for Beginners ([verify](#))
- MySkill Academy / PT LINIMUDA INSPIRASI NEGERI (Apr 2024): Frontend Development (Advanced)
